

PRODUCTION MACHINING

Lake Air Companies utilizes our in-house tool & die shop, top of the line equipment, and state-of-the-art programming software to produce parts that match the unique requirements and tight tolerances of any part design. This allows us to create even the most complex, unusual, or labor-intensive precision machine parts. We take pride in delivering the parts you need in some of the industry's best turnaround times, and our automated equipment, part traceability, and quality checks ensure superior precision and lot-to-lot consistency.

Lake Air Companies' advanced machining techniques enable us to create even the most complex, unusual, or labor-intensive precision machine parts.

Secondary operations include:

- Hardware Insertion
- Drilling
- Riveting
- De-Burring
- Packaging
- Tapping
- Spot and Stud Welding
- Sanding
- Mechanical Straightening

We offer these services individually, or together in any combination your project requires. We will also consider adding new services to meet your unique needs.
